Dental Mock-Up

Have you always wanted to change something about your smile but were hesitant because you didn't know how you would look afterwards? Well, now you can test drive that smile before you make a decision with a reversible process called "Dental Mock-Up."

What is most pleasing about this unique technique is that, in most cases, it can be performed quickly and easily on your existing teeth, without altering them and in an inexpensive manner. Dr. Majid applies and sculpts a temporary tooth colored composite material to your teeth to simulate your new smile. This gives you a view of how your facial features change if you had the smile you always dreamed of. The preview mock-up procedure is just temporary and the mock-up material is easily removed after you have had a chance to review it. We will take before and after photos so you can compare and show your friends and family.
